REAGIR

Conservatoire
et Jardin botaniques
Genève

Hi, my name is Toby
and I am going to accompany
you. I am delighted to spend
some time with you!

Deforestation

Toby is not happy ! Deforestation is happening in many regions of the World.
And you - do you know where?

What a horror! At this rate I shall have no more friends left by 2050!

Connect a threatened biotope with an animal which lives there that is disappearing

Amazon forest

Orangutan

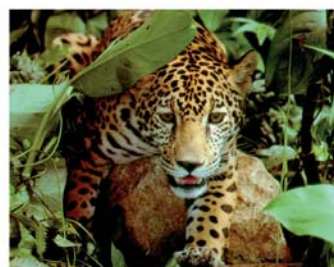

Malaysia

Bonobo

Democratic Republic of Congo

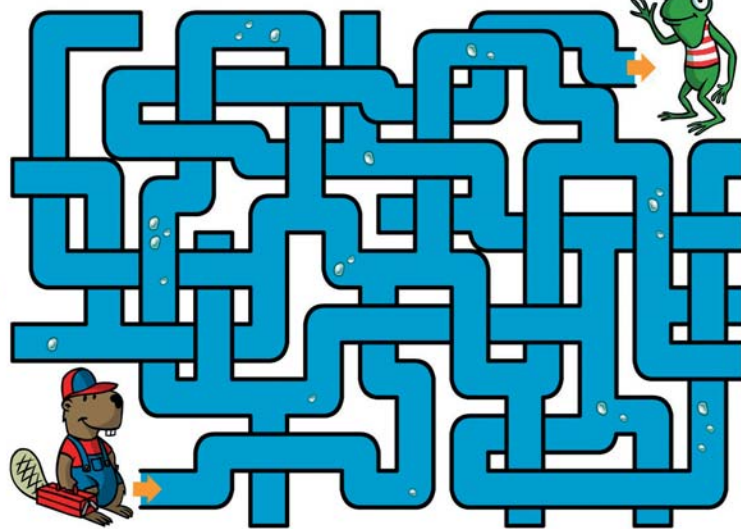

Jaguar

Desertification

Toby doesn't like what he sees with desertification. He suggests that you help his friends to save water.

Help Hector the beaver to find his friend Josie the frog. Josie wants to have her leaking tap (faucet) repaired. For every bubble that you come across think about what you can do to avoid wasting water.

I water my plants in the evening or very early in the morning so that the water does not evaporate so quickly

I collect rainwater to water my plants with

The advice of a gardener

CLIMATE CHANGE

Read each sentence and say if the action described contributes to climate change or if it slows down global warming.

I have a bad influence on my planet ...

I have a good influence on my planet ...

I keep my window open for a long time in winter.

I travel around by bicycle.

I buy strawberries in December.

I turn off the light when I leave the room.

I go to school on the Pédibus.

I have the television on all day long.

Soon I shall be able to wear my sandals all year round? There will be no more seasons?!

Protection of biodiversity

Geneva is both an agricultural canton and an international city.

Did you know that ?

This canton is the largest producer of tomatoes, aubergines and salads in the country.

We are in summer!
Name a seasonal fruit and vegetable which is produced in Switzerland

Here is different varieties of tomatoes grown in the vegetable garden of ProSpecieRara. Do you know how many varieties of tomatoes there are ?

Observation game

Find Geneva varieties in the vegetable garden, and look for their labels.

Holà !

Salut !
Grüezi !
Ciao !

Visit the panel "[perte de la biodiversité](#)" on [ALMERIA \(Spain\)](#).
Discuss what you see with somebody.

Pollution

Yuck ! It is really dirty here, my roots cannot breathe any more! And you, can you help me?

Indicate the objects which you can recycle.

Section "pollution" of the exhibition REAGIR

The Bulrush (*Typha latifolia*) is called a "purifying" plant as it has the capacity to cleanse water. Go and see the specially constructed polluted aquatic zone.

Réponses et Informations

ANSWERS

Deforestation

The Jaguar lives in the Amazon Rainforest.
The Orangutan lives in Malaysia.
The Bonobo lives in the Democratic Republic of Congo.

Desertification

You certainly found for yourself how not to waste the water.
Otherwise be inspired by the panel "What can we do?"
in the section on desertification.

Climate change

The actions 1, 3, and 6 contribute to climate change.
The actions 2, 4 and 5 help to slow down global warming.

Protection of biodiversity

There are some 500 varieties of tomatoes! !
Read the labels and find at least 2 vegetables from Geneva.

Loss of biodiversity

🌴 This is me, the palm, did you find me?
I am made of willow, of course!
There are less than 18 palm trees.

Pollution

The drinks carton, the toothbrush, the plastic bag
and chewing gum are not recyclable.

It is up to you now ! React for our planet !
Prolong your visit and go and look at the panels
"What can we do?" in the exhibition.
Goodbye!

This games booklet was prepared by CJB under the direction of P.-A. Loizeau and D. Roguet,
project officer M. Stielmann, drawings C. Châtelain, concept and realisation J. Orso
in collaboration with C. Bloch for the graphics, translation to English by M. Price.
