(1792)

SAGITTARIA LANCIFOLIA. LANCE-LEAVED ARROW-HEAD.

Class and Order.

MONOECIA POLYANDRIA.

Generic Character.

MASC. *Cal.* 3-phyllus. *Cor.* 3-petala. *Filam.* fere 24.

FEM. *Cal.* 3-phyllus. *Cor.* 3-petala. *Pistilla* multa. *Sem.* multa nuda.

Specific Character and Synonyms.

SAGITTARIA *lancifolia*; foliis ovatis utrinque attenuatis, scapo inferne ramoso. *Willd. Sp. Pl. 4. p. 410.* excluso forsan synonymo Michauxii. *Hort. Kew. ed. alt. 5. p. 283.*
SAGITTARIA lancifolia. *Amæn. Acad. 5. p. 409. Syst. Vegetab. ed. 14. p. 856. Bot. Repos. 333. Mart. Mill. Dict. n. 3.*
SAGITTARIA foliis lanceolato-ovatis *Jacq. Amer. 248.—pict. 121.*
SAGITTARIA foliis maximis simplicibus oblongis utrinque productis, ramulis verticillatis, caule glabro. *Brown Jam. p. 345.*
RANUNCULUS aquaticus plantaginis folio, flore albo, calyce purpureo. *Plum. Cat. pl. amer. p. 7.—ic. 116. f. 1.*

SAGITTARIA *lancifolia* is a native of Jamaica and Cuba, and perhaps of the continent of South-America; but probably not of Carolina, as the plant inserted under the above name by MICHAUX, in his Flora of North-America, is, according to PURSH, a distinct species, distinguished by its beaked, sickle-shaped seeds, and named by him *falcata*. In DONN's Catalogue our plant is said to be a native of the East-Indies, but this we apprehend to be a mistake, though continued in the last edition by PURSH.

If planted in a loamy soil and plunged below the water in the cistern of the hot-house, it flowers freely and makes a very handsome appearance; but it will not blossom without the aid of artificial heat.

Our drawing was made several years ago from a fine plant growing in the stove of E. I. A. WOODFORD, Esq. at that time at Vauxhall.

N.1792.
